### Used, Tested Antique Types

We usually have a good supply of most used antique types made in the 1920s and 1930s. These tubes are globe shaped or tubular, except where marked "ST". "ST" designates the later shouldered bulb. These are mixed brands, and not all are marked with the "200" series numbers. For example, a globe 80 = 280 = 380. Types marked "AUDIO" have become popular with audiophiles in recent years. New and used audio types on our website. We occasionally get unusual tubes such as blue glass tubes and odd brand 201As. These are listed separately on our website as "Collectible Tubes". We also occasionally have new-old-stock of certain antique types. Please check on our website or call for availability.
