

OUR TUBES

This catalog has our current price lists of new tubes, used tubes, antique tubes, new tube sockets, new-old-stock tube sockets, dial lamps, and new literature. Stocks of tubes marked "Audio" are subject to rapid change. Current availability of these is given on our website on our lists of new and used audio and Western Electric tubes. If you do not have internet access, just call us to ask about availability. Some tubes are marked "Call". This does not mean they have an astronomical price. It just means we have a limited number, and you should call to check price and availability. We pride ourselves in having stock of every tube in this catalog, but we have limited quantities of some tubes and some brands. As usual with a catalog, all prices are subject to change without notice.

OTHER PRODUCTS ON OUR WEBSITE

The stocks of other items we carry such as ballast tubes, delay relays, collectible tubes, new-old-stock tube sockets, and original radio and tube literature are subject to rapid change. These items are listed on our website, www.vacuumtubesinc.com. We make every attempt to keep the website up-to-date. If you do not have internet access, just call us to ask about availability.
