

## DIAL LAMPS

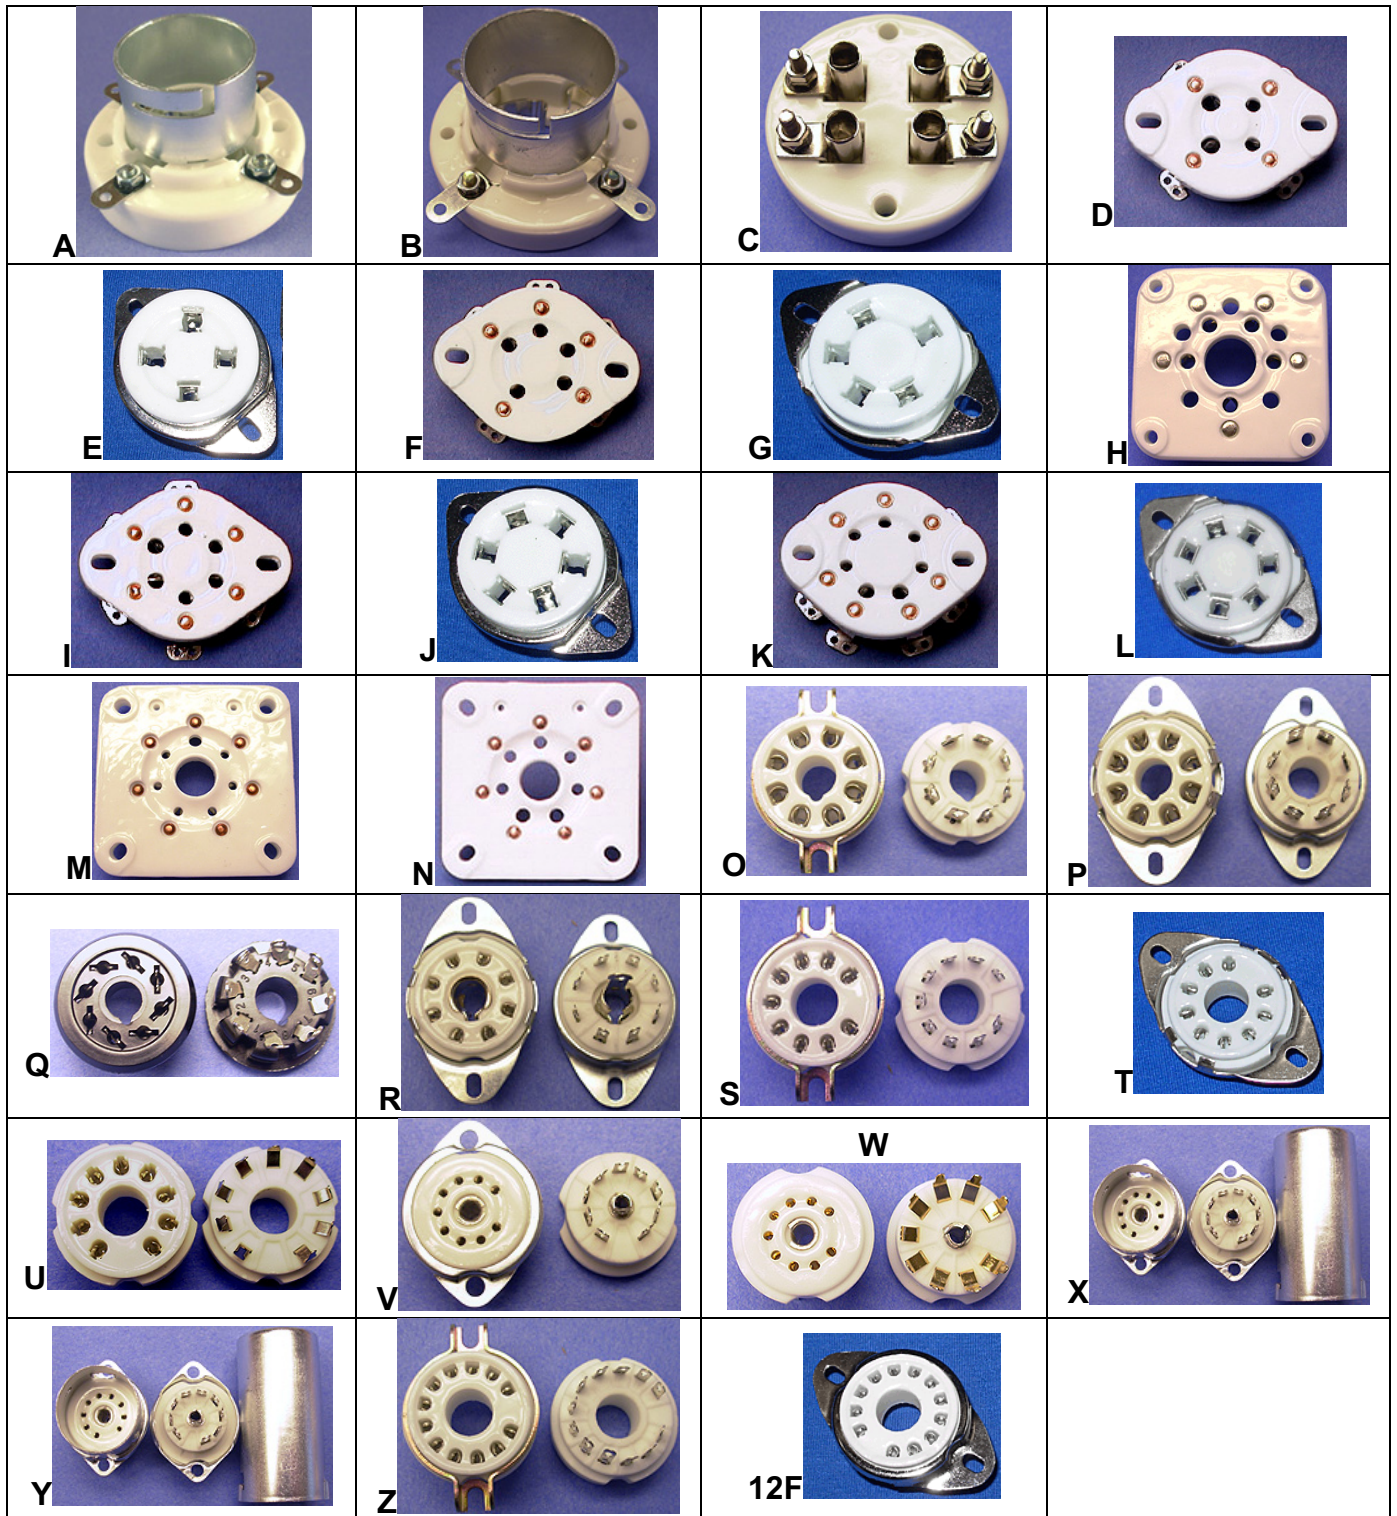

Besides the standard lamps everyone has, we have managed to get stocks of some really uncommon obsolete types, including the 291 (L-291) and 292 (L-292) lamps used in mid-1930s Zeniths. We also have type 1847 lamps (L-1847), which are a super-long-life type 47 (L-47). Check the On Line listing, as we occasionally get stocks of other types. Shipping is free if also ordering tubes. Otherwise the minimum \$8.50 shipping applies.

**Current Manufacture Tube Sockets, Etc.**

We have a wide selection of high quality currently made tube sockets and plate caps for both transmitting and receiving types from four to twelve pins. We also stock eight-pin octal and nine-pin miniature socket savers, and four pin and octal tube bases. We have some stocks of new-old-stock sockets, which are listed on our website due to the changing nature of the stocks. If you don't see what you are looking for, please ask. Note that the pictures are not to scale.
